Florissant Limited is a Kenyan construction company that was incorporated in 2019. We are leaders in modern infrastructure and use the latest technology to achieve desired results. We deal in both commercial and residential projects, as well as road works. We are NCA level 6 certified. We also deal with renovations.

Our team comprises of qualified professionals and competent individuals. We have architects, civil engineers, interior designers and competent casual labourers. We are basically a one stop shop for all your construction needs ranging from concept to creation.

ABOUT US

As a professional Construction Company, the talented team at FLORISSANT LIMITED only works with the best materials and technology.

Our staff members produce consistent results and offer reliable work ethics on every project they work on. Everything we work on is built on a strong foundation, which means it's built to last. Let us work with you from concept to creation.

PRECONSTRUCTION PLANNING

Pre-construction meetings are an excellent way to make certain that everything in your project is communicated clearly before execution operations begin. Pre-construction meetings allow you to define project, monitoring and maintenance goals and help you manage expectations.

By having a pre-construction meeting prior to actual project execution, you get to identify potential issues, conflicts and non-conformities, and get to resolve them without having to spend a lot on change order requests and expensive reworks.

ARCHITECTURAL DESIGN & MODELING

As the architect, you need to make sure the building's flow makes sense. They need to make sure your building is easy to move around in. Beyond the building itself, architecture and design can help bring balance to people's lives.

Without clever new design innovations, we'd be stuck with the same huts and clay houses we lived in centuries ago! An architect's job isn't exactly easy. There's a lot to take into account and a lot of pressure.

However, the job isn't thankless. We reach out and harness the innovative spark and creative spirit that enhances our environments and lives.

CONSTRUCTION MANAGEMENT

We oversee and lead a range of building projects from beginning to end. We are responsible for setting and keeping schedules, monitoring finances, and making certain that everybody is doing what they should, every day.

We also help ensure that the workplace is free of safety hazards, and also deal with the various working relationships that exist on a job site.
